

## OAKLANDS AIMS – March 2023

***A place encapsulating respect, kindness and compassion for all.***

### OUR VALUES

We nurture our learners, staff, parents, carers and partners as central parts of the vision, values and ethos of Oaklands school.

### CURRICULUM

We develop a broad and balanced curriculum with an individual approach that meets the needs of the children and young people with complex needs, allowing them to achieve their full potential through a wide variety of enriching experiences.

### CHILD OR YOUNG PERSON AT THE CENTRE

We use inclusive communication, experiential learning and technology to ensure that our children and young people are nurtured and supported to develop their full potential. We advocate for our pupils and value their contributions, ensuring that our children and young people are encouraged to develop their own voice.

### PARTNERSHIP

We value the contributions of the school community - learners, parents, carers, therapists, staff – by ensuring that individualised targets are created, shared, evaluated and updated with input from all stakeholders.

### SKILLS

We value and promote skills for learning, life and work – recognising the significance of active participation and wider experiences in the local community – for enriching the lives of our children and young people.

### ACCREDITATION

We create and develop a multi-sensory curriculum including the MOVE programme, Rebound therapy Visual and hearing Impairment support and opportunities for personal achievement such as participation in RSPB Awards, JASS, National Qualifications and Duke of Edinburgh Award.

### COMMUNITY

We foster a sense of belonging in our local community, as a valued partner and as active participants in our local area.

### WHAT WE DO

We embed, enshrine and celebrate health and wellbeing, diversity and equality as the key principles of our school community and as the founding values upon which we develop strong relationships and a sense of belonging.
